Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. With respect to the claims, it is unclear as to what is meant by reversible. If the applicant is requiring that the body be placed upon a ladder end in a reversible condition, then that must be clearly recited. Absent such a recitation most fabric material can be turned over or inside out.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4-6, 8, 9, 11, 12, 14-16, 18, and 19 are rejected under 35 U.S.C. 102(b) as being anticipated by Boham et al #2,904,128. Boham et al disclose a ladder hood 4 comprised of a fabric material, that can be stitched together, securing straps 5, that can be stretched, the hood placeable over the end of a ladder stile.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 10, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Boham as advanced above. Boham fails to disclose glue used to secure the straps and terry cloth used to fabricate the hood. Use of glue is an obvious design choice, not expected to produce any new and unexpected results. The use of terry cloth as a fabric is also a design choice. Therefore, to one of ordinary skill, it would have been obvious to use glue to secure the strap and terry cloth to fabricate the device, while producing no new and unexpected results.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bremick 36,499,563 and Kiska #5,533,591 are cited to teach ladder hood assemblies.
